

is foreign
worker

other
installment
plans

target

```
graph TD; A([is foreign worker]) --> B([other installment plans]); A --> C([target]); B --> C;
```

The diagram shows a directed graph with three nodes. The top-left node is a white oval containing the text 'is foreign worker'. The top-right node is a white oval containing the text 'other installment plans'. The bottom node is a yellow oval containing the text 'target'. There are three directed edges: one from 'is foreign worker' to 'other installment plans', one from 'is foreign worker' to 'target', and one from 'other installment plans' to 'target'.
